Company Overview

Malvin Investment Limited is a Tanzania-based building materials manufacturer and supplier operating from Mbezi Makabe, Dar es Salaam. The company supports residential, commercial and contractor-led projects with dependable access to high-quality hard bricks, cement, steel reinforcement bars, sand and other construction materials.

The company works with customers who need practical material guidance, fair pricing, fast response and reliable supply for active construction sites.

Vision

To become a trusted building material partner in Tanzania, known for durable bricks, reliable supply and strong construction support.

Mission

To manufacture high-quality hard bricks and supply dependable construction materials with responsive service and reliable delivery coordination.

Tagline

Tunajenga Pamoja - building together with quality, trust and strength.

Product and Supply Focus

1. High-quality hard brick and block manufacturing for walling, residential projects and contractor bulk orders.
2. Cement sales and supply for foundations, slabs, plastering, masonry and general construction.
3. Nondo and steel reinforcement bars for structural strengthening and concrete works.
4. Sand, aggregates and supporting materials needed by active building sites.
5. Customer support for material selection, quantity planning, quotations and delivery coordination.

Primary Customer Segments

Contractors

Reliable bulk supply for active project schedules and recurring site requirements.

Developers

Material planning and supply coordination for residential and commercial builds.

Homeowners

Practical guidance and fair supply options for new homes, extensions and renovations.

Why Customers Choose Malvin

1. High-quality hard bricks manufactured for better building construction, stronger walling and durable practical use.
2. Fair pricing for customers balancing cost control with reliable performance.
3. Fast response through direct phone and WhatsApp communication.
4. Convenient Dar es Salaam location in Mbezi Makabe for local sourcing and coordination.
5. A product mix that covers key site needs: bricks, cement, steel, sand and more.

Service Workflow

1. Enquiry

Customer sends product needs, site location, quantities and preferred delivery timing.

2. Quotation

Malvin confirms availability, advises where needed, and prepares a practical quotation.

3. Supply

Materials are prepared for collection or coordinated delivery according to the order.

Operational Activity Images

The visuals below illustrate the business nature: cement and sand supply, concrete mixing activity, steel reinforcement stock, and preparation of construction materials for customer delivery.
